T. Jerry Jackson
Revenue
Commissioner

January 20, 2003

Members of the General Assembly and Others:

This report has been developed by the Department of Revenue for the purpose of fulfilling the Commissioner's responsibility of continuing to provide the General Assembly with the effect of property tax administration and the continued enactment of laws created by legislation and administered by the Department of Revenue, Property Tax Division.

The information contained in this report is made pursuant to the requirements of O.C.G.A. §§ 48-5-349.5, 48-5-7.1 and 48-5-7.4. It is hoped this report can be a tool for further understanding the state of Property Tax Administration in Georgia.

The staff of the Property Tax Division will be able to provide more information or clarification of information upon request.

Respectfully Submitted,

T. Jerry Jackson
Revenue Commissioner

HIGHLIGHTS OF ANNUAL REPORT

DIGEST REVIEW:

- The Revenue Commissioner continues to insure uniformity and equalization between and within counties using the same procedures enacted in 1992, and in the manner prescribed in Article 5A of Chapter 5 of Title 48.
- Of the 53 counties falling in the 2001 review year, 15 county ad valorem tax digests failed to meet the state standards for approval, compared to 6 counties in 2000. As a result, \$5.00 per parcel penalties were assessed in the amount of \$176,220 and \$1,752,544 in additional state tax. Fulton County's additional state tax assessment of \$1,461,962 comprised 83% of the total amount. Appeals to the \$5.00 per parcel penalties, filed by Franklin, Lumpkin, and McIntosh Counties, are pending at this time.
- Of the other 106 non-review counties, 17 county ad valorem tax digests failed to have an acceptable overall average assessment ratio, compared to 32 in 2000. As a result, additional state tax in the amount of \$419,778 was assessed these 17 counties.
- The average level of assessment, as measured by the Median, has fallen from 37.90% in tax year 1995 to 36.99% for tax year 2001. Even so, the assessment level remains within the acceptable standard of 36.00% to 44.00%.
- The average level of uniformity, as measured by the Coefficient of Dispersion, has decreased from 15.38% in 1995 to 11.71% for 2001, indicating continued improvement in equity and uniformity.
- The average level of assessment bias, as measured by the Price Related Differential, has also shown continued improvement; a measure of 100.98% in 2001, compared to 103.27% in 1995.
- Assessed values reached a high of 220.1 billion in 2001 or a 9.3% increase from the values reported in 2000; while the average millage rate of 24.19 increased less than 1% from 2000 to 2001.

PUBLIC UTILITIES:

- The statewide average equalization ratio for public utility property in 2002 was 36.69% compared to 37.28% in 2001, constituting a slight decrease in the statewide equalization ratio.
- Equalization ratios for 82 of the 159 counties were proposed at a ratio less than 40%.

PREFERENTIAL AGRICULTURAL ASSESSMENT:

- Since the implementation of Preferential Agricultural Assessment in 1984, the number of parcels in this program has risen from approximately 10,000 to approximately 20,600; the amount of value eliminated from the digests has increased from 86.9 million to 195.1 million; and the total tax dollars lost by local government has increased from 1.6 million to approximately 5 million.

CONSERVATION USE VALUATION:

- Since the implementation of Conservation Use Valuation in 1992, the number of parcels in this program has risen from approximately 16,000 to more than 75,000; the amount of value eliminated from the digests has increased from 395.8 million to approximately 2.8 billion; and the total tax dollars lost by local government has increased from 8.9 million to approximately 72 million.
- These dramatic increases are expected to continue to grow as property valuations increase.

TIMBER TAXATION:

- Since 1992, values reported for timber sales and harvests have increased from 493.1 million to 676 million or 42%, while the revenues for the same time period have increased from 11.5 million to 17.2 million, or approximately 48%.

Reporting Requirements

The Commissioner's responsibility for continuing to provide the General Assembly with the effect of property tax administration and the continued enactment of laws created by legislation and administered by the Department of Revenue, Property Tax Division are as follows:

- O.C.G.A. Section 48-5-349.5 requires the examination of the digest of each county to ensure that all property valuations are reasonably uniform and equalized among the counties and within the counties. This code section provides for a status report on this review process along with the Commissioner's observations regarding the progress of the counties in ad valorem tax administration.
- O.C.G.A. Section 48-5-7.1 requires the submission of a report showing the fiscal impact of the law providing for the preferential assessment of tangible real property devoted to agricultural use. Qualified farm property is assessed at 75% of the value under this program and this report analyzes the effect of this program on taxpayers and levying authorities.
- O.C.G.A. Section 48-5-7.4 requires a report showing the fiscal impact of the law providing for conservation use assessment of certain agricultural properties attendant with this code section. Qualified farm property is assessed at its current use value using a table of values established by the Commissioner following specific legal procedures. This report analyzes the adverse fiscal impact, if any, on other taxpayers and levying authorities.

Digest Review Procedures

The Commissioner, through the Property Tax Division, has been given the statutory duty of reviewing county tax digests to determine if the digests meet the criteria mandated in statute case laws and regulation for level of assessment¹, uniformity², and equalization³.

Article 5A of Chapter 5 of Title 48 establishes the procedure for the Commissioner to equalize county property tax digests between and within counties and compel county boards of tax assessors to make adjustments in property valuations so as to insure uniformity and equity.

As directed by the legislature, the Commissioner has adopted a three-year digest review cycle in which each county's tax digest is reviewed extensively to determine the level of assessment, uniformity and equalization in each property class. In any given year, one third of the county tax digests are subject to extensive statistical testing. Counties, which do not meet the criteria, set forth in the statute and regulations are allowed an opportunity during the three-year cycle to correct any deficiencies by the next review year. The other counties that are not being extensively reviewed are examined for level of assessment to equalize the state levy and public utility assessments. The Commissioner approves any county's digest as being reasonably uniform and equalized if the digest meets certain standards:

For those digests submitted by counties in their digest review year, the Commissioner completes his review on or before August 1 of the following tax year or within 30 days of the date the ratio study results are provided by the State Auditor. Based upon this review, the Commissioner will approve any digest when it is found to be reasonably uniform and equalized by having met the following state established standards:

the average level of assessment for each class of property meets the state standards of 36% to 44%;

the average measure of overall equalization, the *coefficient of dispersion*⁴, meets the state standard of 15% or less for residential properties and 20% or less for all other property classes; and

the bias ratio, or statistical measure of *price related differential*⁵, meets the state standard of 95% to 110%.

The Commissioner conditionally approves the digest and assesses a penalty of \$5.00 per taxable parcel of real property if a county's review year digest contains the same or similar deficiencies as the previous review year digest. If the overall average assessment level does not meet state standards, the county is assessed additional state tax in the amount equal to the difference between the state's one-quarter of a mill that would have been produced if the digest had been at the proper assessment level and the amount the digest actually produces for collection purposes.

For those counties submitting their digest during a non-review year, digests are evaluated by the

¹ The comparison of an individual property's actual sales price versus its assessed value is a measure of the level of assessment. The ratio required by state statute is 40%.

² The measurement of quality of the results produced by a county's valuation program will determine if properties are valued in a uniform manner.

³ Equalization is the measure of equality of assessment. In order to possess good equalization, a county tax digest should value all properties at about the same level of assessment.

⁴ The coefficient of dispersion is the statistical representation of equalization.

⁵ The price-related differential is the statistical measure of assessment bias. This demonstrates whether lower or higher priced properties are more accurately assessed.

Commissioner based on the overall average assessment ratio deviation from the proper assessment ratio of 36% to 44%.

If the Commissioner determines that a county's digest does not meet the acceptable ratio of 36% to 44%, the county is assessed additional state tax in the amount equal to the difference between the state's one-quarter of a mill that would have been produced if the digest had been at the proper assessment rate and the amount the digest actually produces for collection purposes.

Beginning with the 2000 tax year digest reviews, in order to measure the compliance of each county in meeting state standards for digest approval, the Commissioner utilizes the information provided by the State Auditor from the sales ratio studies developed for each county. Each county's ratio study measures the statistical standards of level of assessment, uniformity and equalization.

Results of the 2001 digest reviews for counties falling in the 2001 Review Year and the current status of each:

The review of the 53 counties falling within the 2001 review year resulted in 15 counties being subject to the \$5.00 per taxable parcel penalty, additional state tax, or both.

COUNTY	\$5 PARCEL PENALTY	ADDITIONAL STATE TAX ASSESSED	INTEREST PAID
Baldwin		24,859	
Chattahoochee		1,358	27
Emanuel		8,933	179
*Franklin	67,260	42,210	
Fulton		1,461,962	
Glascocock		2,613	
Glynn		104,850	
Jasper		9,095	
*Lumpkin	60,045	39,088	
*McIntosh	48,915	1,581	
Murray		22,655	453
Stewart		3,043	
Tattnall		9,752	
Tift		18,348	367
Wheeler		2,197	
TOTAL	176,220	1,752,544	1,026

*These counties have appealed the \$5 per parcel penalty. Consent Orders to defer the penalty and establish guidelines for correcting the digest by the next review year are being developed.

The review of the 106 non-review counties resulted in 17 counties being assessed additional state tax:

COUNTY	ADDITIONAL STATE TAX	INTEREST	COUNTY	ADDITIONAL STATE TAX	INTEREST
Brantley	5,136	103	Miller	3,907	
Catoosa	25,907	518	Montgomery	4,550

Lincoln	15,555	311	Wilkes	7,624	152
Long	3,610				
			TOTAL	419,778	3,633

Several graphs are being included on the following pages to provide a visual indication of the various

measurable statistical standards since 1995:

- **Figure 1** - This graph indicates that, even though the average Median Ratio has fallen from 37.90% in 1995 to 36.99% in 2001, the assessment level remains within the acceptable standard of 36% to 44%. In general, Georgia law requires taxes to be assessed at 40% of the fair market value of the property. So the overall level of assessment is a measure of the effectiveness of the county's valuation program.

- **Figure 2** - This graph shows the average level of uniformity, as measured by the Coefficient of Dispersion, and indicates the equality of assessments between individual properties. Case law indicates that this is the most important measure of fairness within a taxing jurisdiction. Beginning with the 1995 tax year, the Commissioner, through regulation, tightened the acceptable standard of equalization and uniformity from 20% or less to 15% or less for residential properties, and from 25% or less to 20% or less for non-residential properties. Since 1995, this statistical average has decreased from 15.38% to 11.71% for 2001, demonstrating continued improvement.

Figure 3 - This chart shows the past seven years average assessment bias, as measured by the Price Related Differential. This standard has also shown continued improvement from 1995 when the average was 103.27% to the 2001 average of 100.98%.

Value and Revenue

Since the implementation of the new digest review procedures, counties have been performing either total or partial revaluations and updates to properties in order to conform to the state standards for acceptable digests. In doing these revaluations and updates, property values have increased significantly since 1995.

Figures 4 and 5 show the changes in the total values and the average millage during the last several years, while **Figure 6** shows the percentage breakdown, by property class, of the values reported on the 2001 tax digests.

Property tax continues to be the primary revenue source for local governments. Currently, approximately 6.9 billion in revenue is collected from property taxes in Georgia. Because there is limited Department involvement in the collection of city taxes, this report does not focus on this tax type. **Figures 7 and 8** show the total revenues and the revenue breakdown by tax type generated from the 2001 tax digests. **Figures 9 through 14** show the amount of tax revenue and a 5 year comparison for county, school and state tax purposes.

Public Utilities

O.C.G.A. Section 48-2-18 requires the Commissioner to annually propose assessments for public utility property and to insure that these properties are assessed at the same overall average assessment level as other property in the county. Each utility company is required to annually return their properties indicating location, description, type of property and valuation. The Commissioner's staff inspects these returns to insure the accuracy of each utility company's declarations.

The location of the property must include the county within which it is located, the tax district within that county, (i.e. County, City, etc) and a physical address such as a street name. These property returns also include a physical description of the property. The utility company is required to identify the property's designated type, operating or non-operating. Operating property is defined as any property required, directly or indirectly, for the operation of the utility. Non-operating property would then be any property not required for the operation of the utility.

In determining each county's proposed assessments for 2002 public utilities and airlines, the Commissioner utilized the equalization ratios using 2001 digest values certified by the county tax commissioners and ratio statistics developed by the State Auditor. This method insured that proposed public utility values were set at the same overall average assessment level as other properties.

Once the State Board of Equalization approved these values and equalization ratios, assessments were issued to the counties and utility companies. Each county board of tax assessors then determined the final assessment of utility properties by either accepting the State's proposed equalization ratio or substituting their own in issuing assessment notices to the utility companies.

Table 3 on the following page shows each county's 2002 equalization ratio as proposed by the state and the ratio finally determined by the county board of tax assessors. In most instances where the ratio used by the county exceeds the state proposal, it is due to the county's having preformed an update or revaluation.

STATE WIDE PROPOSED RATIO AVERAGE:			36.69					

Figure 15 below shows the trend of the statewide proposed public utility equalization ratios.

PREFERENTIAL AGRICULTURAL ASSESSMENT

In the 1983 legislative session, O.C.G.A. § 48-5-7.1 was passed establishing preferential assessment of tangible real property devoted to bona fide agricultural purposes.

By statute, all real property is assessed at 40% of fair market value, however, the new legislation provided for a 30% level of assessment or 75% of the value at which other taxable real property is assessed.

In making application for preferential assessment, qualifying taxpayers must have signed a covenant (contract) agreeing to continuously maintain the property in agricultural pursuits for a period of 10 years. Transfers of ownership were allowed, provided the property was transferred to another qualifying entity that agreed to continue the property in agricultural pursuits for the remainder of the covenant period. Otherwise, the covenant was breached and a penalty imposed. Penalties ranged from 15 times the tax savings if the breach occurred during the first year of the covenant, to a minimum of 3 times the tax savings if a breach occurred during the tenth year of the covenant.

Fiscal Impact

The **Table 4** below shows for each tax year, since the beginning of this program, the statewide number of parcels, the total value eliminated, the total tax dollar loss, and the percentage change of each category.

Table 4 - Preferential Agricultural Assessment Fiscal Impact

YEAR	PARCELS	PERCENT CHANGE	TOTAL VALUE ELIMINATED	PERCENT CHANGE	TOTAL TAX DOLLAR LOSS	PERCENT CHANGE
1984	10,001	N/A	86,969,884	N/A	1,588,974	N/A

Figures 16 and 17 below illustrates the amount of revenue loss and the amount of value removed annually from digests affected by the Preferential Agricultural Assessment program.

Conservation Use Valuation

In 1991 the Legislature embraced the “current use” valuation concept. This bill provided for the assessment for ad valorem tax purposes of certain qualifying properties based on current use value rather than fair market value. The bill also provided for the Commissioner to develop a table of current use values to be used in all counties, which results from a legislative formula taking into account the amount of income the land is capable of producing when growing certain crops and timber, and factors founded in market data using only farmer to farmer land sales. The data is grouped into nine agricultural districts in Georgia.

Unlike the Preferential Agricultural Assessment Program in which assessments are based on 30% of fair market value rather than 40% of fair market value statewide, the valuation of property in Conservation Use Covenants is most significant in the Urban Areas of North Georgia and other parts of the State where strong residential and commercial development is occurring. As a result, agricultural landowners’ interest is greatest in these transitional areas.

Several reports, graphs, and charts are being included in this report to show the fiscal impact of conservation use valuation.

Table 6 below represents the 10 counties most affected by Conservation Use Assessment Covenants. Shown in this table is a listing, by county, of the number of applications (parcel count), assessed value eliminated from the digest, the amount of tax loss for each of the tax types, and the total tax loss. The total amount of tax loss in these 10 counties accounts for approximately 35% of the total amount of tax loss statewide.

TABLE 6 – CONSERVATION USE FISCAL IMPACT

Table 7 on the following pages provides a listing of each county and the number of parcels receiving Conservation Use Assessment, the amount of value eliminated from the taxable digest in each county and the tax dollar loss in each appropriate taxing district (State, County, School, Special) and the total tax dollar loss. Special districts include Hospital Authorities, Fire Districts, Industrial Authorities, etc.

TABLE 7 - CONSERVATION USE VALUATION ASSESSMENT FOR 2001

Figures 18 and 19 below illustrate the amount of revenue loss and the ever increasing amount of value removed annually from digests affected by the Conservation Use Valuation program since 1995.

Timber Impact Report

Prior to 1992, timber was taxed annually as part of the tax digest. At that time, approximately 82 counties placed some value on standing timber, while other counties either did not tax timber at all or could not identify the value separate from the land value.

Along with Conservation Use Valuation, the amendment to the Georgia Constitution, which was approved by the electorate in 1991, also provided for a one-time assessment on harvested timber versus the annual taxation of timber as part of the value of real estate. Timber is now taxed once at its current value when harvested.

Pursuant to O.C.G.A. Section 48-5-7.4(s), **Table 8** below and on the following page is the report required regarding timber revenue. This report shows the 2000 total assessed value (100%) of timber and the revenue for county and school purposes as reported on each county's 2001 digest.

TABLE 8 – 2000 TIMBER REVENUE REPORTED ON 2001 TAX DIGESTS
